Oregon Human Powered Vehicles

Proudly Announces

Human Power Challenge 2009

10th Year HPC Anniversary!

PRIZES & RAFFLE

Portland International Raceway

Memorial Day Weekend May 23 – 25

Human Power Challenge: Open to all types of Human Powered Vehicles (recumbent or upright). Race at a venue that tests a rider in several disciplines: Road Racing, Time Trialing, Drag Racing, Auto Cross, and 200 Meter Flying Sprint. Social activities and exhibits of the latest in "bent" technology abound all during the weekend.

Left Coast Velomobile Gathering: 3rd Annual velomobile extravaganza! Velomobiles are a human powered vehicle that aerodynamically encloses the rider/bike, shielding them from weather while enhancing speed at the same time. Velo specific rides, exhibitions for the spectators, and a symposium for all who want to know more about these marvels of transportation are all part of the action packed weekend at PIR.

ePower Challenge: 2nd year of the ground breaking electric assist bike race. Last year's race was the first ever e-assist bike race in the U.S.A. There will be several races to compete in. From commercial models to home brew bikes, all are welcome to participate and celebrate this forefront technology.

And in addition we are proud to have our friends at **Oregon Electric Vehicle Association** be onsite to display and demonstrate a wide variety of commercial and home built electric vehicles.

Come out and Join Us! Race, spectate, and learn about this paradigm shift in transportational reality. Admission is free for spectators. For registration and further details, see below.
